

## Vaxart, Inc. Reports Inducement Grants Under Nasdaq Listing Rule 5635(c)(4)

November 19, 2024

SOUTH SAN FRANCISCO, Calif., Nov. 19, 2024 (GLOBE NEWSWIRE) -- Vaxart, Inc. (Nasdaq: VXRT) (the "Company" or "Vaxart") today announced that on November 15, 2024, the Compensation Committee of the Board of Directors granted inducement equity awards covering an aggregate of 91,500 shares of its common stock to two new non-executive employees to induce them to accept employment with Vaxart.

The awards consisted of stock options to purchase an aggregate of 61,000 shares of Vaxart's common stock, which vest as to 1/4th of the total shares on the one-year anniversary of the grant date, and as to 1/48th of the total shares on each month thereafter, and have a per share exercise price equal to the closing price of Vaxart's common stock on the grant date; and restricted stock unit awards covering an aggregate of 30,500 shares of Vaxart's common stock, which vest as to 25% of the shares underlying the awards on the first, second, third and fourth anniversary of the grant date.

The awards were granted under the Vaxart, Inc. 2024 Inducement Award Plan as an employment "inducement award" pursuant to Nasdaq Listing Rule 5635(c)(4). The Inducement Plan is used exclusively for the grant of equity awards to individuals who were not previously employees of Vaxart (or following a bona fide period of non-employment) as an inducement material to entering into employment with Vaxart.

### About Vaxart

Vaxart is a clinical-stage biotechnology company developing a range of oral recombinant vaccines based on its proprietary delivery platform. Vaxart vaccines are designed to be administered using pills that can be stored and shipped without refrigeration and to eliminate the risk of needle-stick injury. Vaxart believes that its proprietary pill vaccine delivery platform is suitable to deliver recombinant vaccines, positioning the company to develop oral versions of currently marketed vaccines and to design recombinant vaccines for new indications. Vaxart's development programs currently include pill vaccines designed to protect against coronavirus, norovirus and influenza, as well as a therapeutic vaccine for human papillomavirus (HPV), Vaxart's first immune-oncology indication. Vaxart has filed broad domestic and international patent applications covering its proprietary technology and creations for oral vaccination using adenovirus and TLR3 agonists.
